

Tiscor® Paperless Inspections

TISCOR's Inspection Manager software works with the Kyocera 7135 smartphone to schedule, track and document inspection and maintenance management activities. Inspection Manager eliminates paper forms from data collection activities and also eliminates the manual data entry of the collected information. Using Inspection Manager with the Kyocera 7135 smartphone offers a feature-rich, cost-effective solution that greatly enhances communication with mobile workers. This software application is perfect for organizations that need to stay in contact with mobile workers when they are completing inspections or maintenance at off-site locations.

How does it work?

Inspection/maintenance criteria are entered into the software program. The parameters for the daily inspections/maintenance are then transferred to the Kyocera 7135 smartphone. Using the keypad on the Smartphone, the user is able to document collected data. At the end of the shift, collected data is transferred back to the host PC. A variety of reports are available for review of information.

What are some of the features of Inspection Manager?

- Ability to direct inspectors on routes
- Prompts questions and instructions
- Documents performance of tasks
- Provides compliance reporting
- Alerts for responses outside of acceptable parameters
- Records deficiencies
- Generates Work Orders
- Provides for variable scheduling
- Issues action notices

What are the benefits of using Inspection Manager with the Kyocera 7135 smartphone?

- Increases productivity and accuracy
- Saves time
- Standardizes procedures and data
- Provides extensive report writing
- Eliminates hand-written forms
- Eliminates manual data entry
- Ensures data integrity
- Speeds up the data collection process
- Verifies work is complete
- Improves accessibility of information
- Time and date stamps all activities
- Proves regulatory compliance to agencies such as OSHA, NFPA, JCAHO and EPA and more

What types of inspections can be performed?

- Building maintenance
- Quality control inspections
- Equipment inspections
- Property condition inspections
- Production equipment monitoring
- Waste water plant inspections
- Janitorial and housekeeping inspections
- HVAC inspections
